1. **Generate Testcase Via File upload**

— SWAGGER → QUALITY TEST COVERAGE

Generate reliable API testcases from Swagger

Upload, validate, generate, review, and export — through one controlled Testleaf-themed workflow.

01 Upload — 02 Validate — 03 Generate — 04 Export

AI-powered · ✓ Spec-grounded · ↓ Postman & Excel export

Swagger uploaded and validated successfully.

— STEP 2

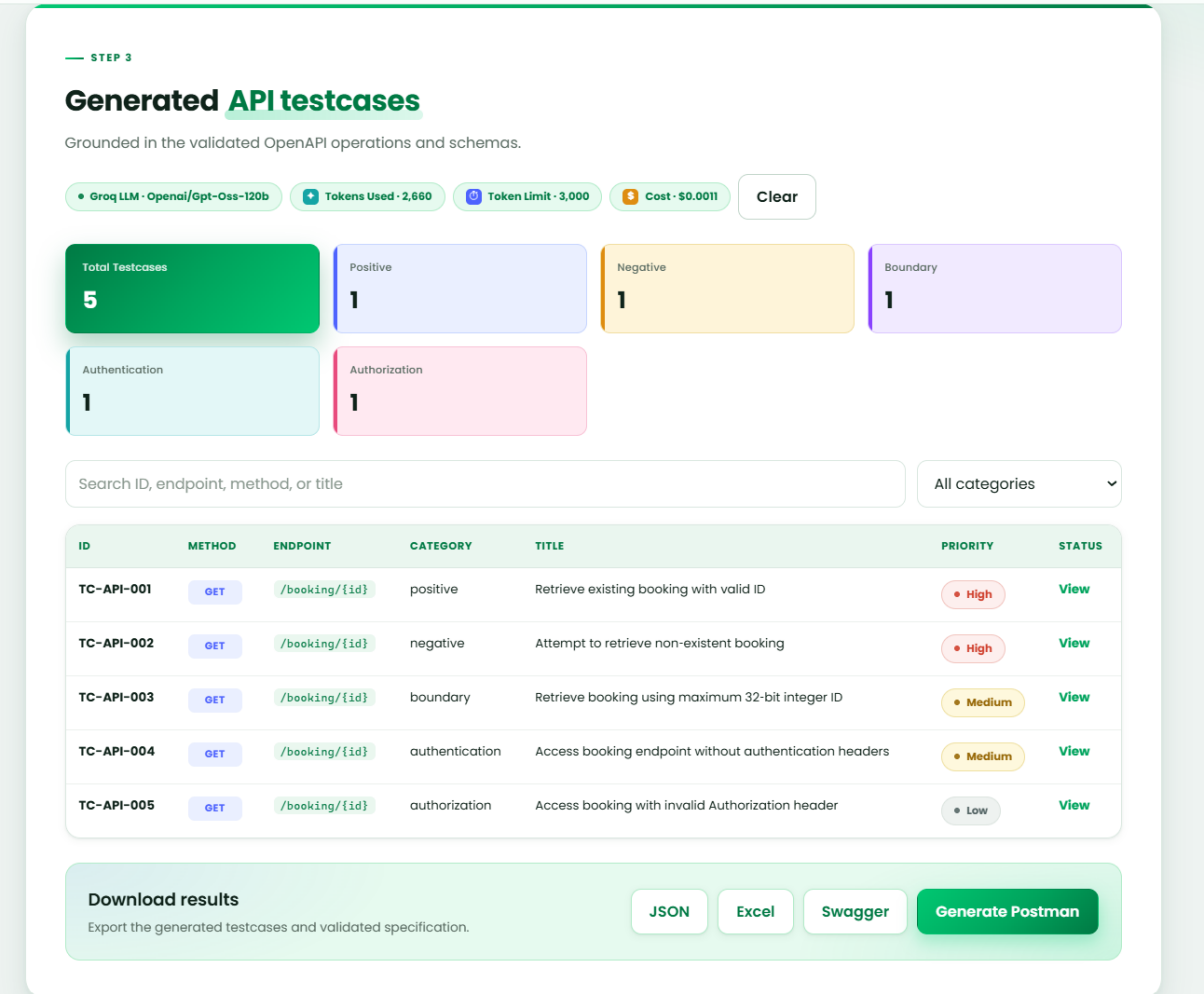

Validated

• Valid Specification

booker-api.yaml

OpenAPI Version	Model	Errors	Warnings
3.0.3	groq · openai/gpt-oss-120b	0	1

Proceed to generate testcases

2. Generate Testcase Via Link

— SWAGGER → QUALITY TEST COVERAGE

Generate reliable API testcases from Swagger

Upload, validate, generate, review, and export — through one controlled Testleaf-themed workflow.

01 Upload — 02 Validate — 03 Generate — 04 Export

AI-powered · ✓ Spec-grounded · ↓ Postman & Excel export

○ Files ◉ Link

— STEP 1

Link Swagger specification

Enter a public HTTPS URL for a direct OpenAPI YAML, YML, or JSON document.

Specification URL

https://petstore.swagger.io/v2/swagger.json

Validate and continue
